Material Safety Data Sheet

First, chemical product and company identification

[Chemical name]: Gardenia oil (carrier oil)

[Manufacturer Name]: Guangxi Shanyun Biochemical Science and Technology Co., Ltd

[Manufacturer Address]: #2 Industrial Park of Luzhai County, Liuzhou, Guangxi, China

[PC]: 545 600

[Tel]: +86 772-6828887 6828859

[Fax]: +86 772-2329792

[Email]: zhuqr2002@gxqianrong.com

Second, hazards summarizing

This production process using pure water to extract Gardenia Oil, the entire production process does not use any organic solvent, so the product free of organic solvent residues, and non-hazardous.

Third, handling and storage

Operation Notes: The operator must go through specialized training, strict adherence to rules;

Storage Precautions: Do not use iron products to fill; dark sealed;

Fourth, the physical and chemical properties

Appearance: Pale yellow viscous liquid, has the unique faint scent of gardenia.

Main purposes: 1、It's the main raw material to extract of linoleic acid; 2、easily absorbed by the skin, make it smooth and wet greasy, and can be used for skin care cosmetic health and care products; 3、edible.

V. Stability and reactivity

Stability: A variety of physical and chemical indicators similar to edible vegetable oil

Reactivity: It's crude oil, and contains a small amount of crocetin and crocin, case of iron black.

Six, Regulatory information

Production Safety Law (June 29, 2002 the Ninth National People's Congress passed twenty-eighth session); Environmental Protection Law (December 26, 1989 Seventh NPC Standing Committee try one session); safety production license of the column (January 7, 2004 the State Council executive meeting 52);
